# CUSTOMIZED SAFETY TRAINING.

Our safety training programs are totally customized to address the specific challenges you and your employees face. ISTS can provide a complete assessment to identify your training needs, and we work closely with your staff to establish goals and objectives for those attending training. Our unique training courses offer a positive, interactive learning environment for your employees.

## TABLETOP INCIDENT MANAGEMENT TRAINING

In 1998 Gary Yurt created the City of Yurtville™ a large 10' x 20' tabletop construction that depicts an urban city roadway, railroad, river, industrial park, schools, hospital and several types of businesses. Yurtville™ provides reality-based incident management scenarios which allows participants to role play, practice group problem-solving, participate in information sharing, and practice decision making.

## MOBILE SIMULATOR

ISTS built the first simulator for both Hazmat and Lockout training. Your employees gain hands-on practice controlling hazardous energy with this professionally designed system that operates up to 150 psi. The simulator features industrial piping, 35 working industrial valves, a working industrial process pump, pump off-loading station, 14 flanges, a water deluge system similar to what is found in industrial settings.

# YOUR SAFETY PARTNER.

## INDUSTRIAL HYGIENE

We provide a comprehensive range of industrial hygiene services to help ensure your employee exposure to chemicals and noise is below OSHA's Permissible Exposure Limits and ACGIH's Threshold Limit Values,<sup>®</sup> such as:

- ◆ Air monitoring
- ◆ Employee exposure assessments
- ◆ OSHA compliance programs for hazardous chemicals (lead, cadmium, chromium, etc.)
- ◆ Exposure/Infection control plans
- ◆ Data Sheets (SDS) development
- ◆ Noise/Sound level monitoring
- ◆ Recommendations for use of less hazardous materials
- ◆ Written respirator programs, including respirator selection and change-out schedules
- ◆ Selection of appropriate personal protective equipment
- ◆ Right to Know/Hazard Communication/GHS Training

## RESPIRATOR FIT TESTING

ISTS offers both quantitative and qualitative respirator fit testing. For quantitative fit testing, we utilize the TSI Portacount Quantitative Respiratory Fit Tester, the most advanced technology in determining the respirator "fit factor."
