

SHUTDOWN/OUTAGE SAFETY MANAGEMENT

COMPLIANCE JUST GOT EASIER.

ISTS's safety professionals will work with on-site management to review and facilitate project related safety procedures, conduct physical hazard inspections and train employees on workplace hazards and safety regulations. ISTS serves industries which include; chemical, petrochemical, power generation, construction, distillery, automotive, warehousing, gas drilling, transportation, other commercial and industrial clients globally.

TEMPORARY SAFETY STAFFING

When you need a temporary safety professional, your needs are often immediate. As an expert safety staffing company, we can rapidly provide top-quality safety professionals to meet your company's requirements.

PLANT & OUTAGE SAFETY MANAGEMENT

Outage safety management can be overwhelming even for the largest organizations, especially when it comes to being in compliance. Compliance can be difficult while there are multiple projects being conducted simultaneously at any given facility location. The Safety Professionals at ISTS can assist in ensuring both federal and state compliance with regards to 1910 and 1926 OSHA standard regulations. ISTS has a proven track record of outage safety management and has completed high hazard projects without so much as a first aid incident. Our motto is simple, "No injuries, No excuses."

CONFINED SPACE RESCUE STANDBY

ISTS's Confined Space Rescue Team consists of active and retired emergency responders from across Kentucky. These proven professionals meet all

national standards and have a wealth of real-life experience in technical confined space rescue.

The ISTS Rescue Team is available for standby services to clients who are required by law (OSHA 1910.146) to have a trained and equipped rescue team available on-site while permit required confined space entry work is being done.

Team size and equipment depends on the type of work and the number of entrants into the confined space. ISTS's team has provided standby services to support all types of confined space scenarios.

All members of ISTS's Confined Space Rescue Team receive extensive training in:

- ◆ Confined space entry and rescue
- ◆ Lockout/Tagout
- ◆ Emergency medical care
- ◆ Haz-Woper
- ◆ Incident Command System (ICS)
- ◆ Fire Prevention and Protection
